

When looking for a CMMC consultant to help your organization and/or your customers, you want someone who understands the controls as well as the assessors, so that your implementation is more likely to pass the assessment.

Edwards is a CMMC Registered Provider Organization (RPO), but more importantly our consultants are also assessors who have been through the Certified CMMC Professional (CCP) course. In fact, many of our consultants teach the CCP and the Certified CMMC Assessor (CCA) classes and developed the curriculum to do so.

Edwards partners with you to ensure readiness for the formal CMMC assessment process. Where weaknesses or gaps are found, we develop goal-oriented, impactful action plans that support compliance and also positively impact your business.

We work with you to identify and manage the implementation of your controls and stand with you to advocate during the formal assessment.

EDWARDS PERFORMANCE SOLUTIONS IS HERE FOR YOU

SERVING as your preferred consultant to prepare you or your customers for CMMC.

PROVIDING subject matter expertise to guide your CMMC journey.

PERFORMING gap assessments, preparation assessments and facilitated self-assessments.

SUPPORTING your business.

THE EDWARDS DIFFERENCE ...

WE ARE DOD CONTRACTORS TOO – We've been through this process ourselves. Even with our commitment to cyber resilience, we transformed our internal process expertise and robust program management to align with CMMC.

WE ARE ASSESSORS – We understand what the assessors will expect to see when you invite them in. Our team will help make your assessment experience as smooth and cost effective as possible. Our on staff Provisional Assessors (PA) are among the very small number of individuals in the world capable of conducting assessments today.

WE ARE TRAINING THE ASSESSMENT COMMUNITY – As a CMMC-AB Licensed Partner Publisher (LPP) Edwards is developing the curriculum to train the assessment community. As a CMMC-AB Licensed Training Provider (LTP) our consultants are also conducting the training classes.

SIMPLE APPROACH; COMPREHENSIVE RESULTS

Our targeted yet simple approach delivers big results that respect your budget, timeline, and inform key stakeholders. Each engagement is tailored to the needs of your business.

PRE-ASSESSMENT SUPPORT

Edwards conducts tailored interviews to learn about your entire ecosystem and target our engagement to your business needs.

FULL-SCALE GAP ASSESSMENT

We review your systems, assess your processes, identify gaps, and ensure existing practices are fully implemented.

DATA FLOW DIAGRAMMING

We identify and document the flow of FCI and CUI throughout your organization and between you and your external partners – providing the foundation for scoping your CMMC environment.

REMEDATION PLANNING & ROADMAPPING (POAM)

We provide an actionable compliance roadmap to address remediation items, outlining business risk, priorities, and investments that result from identified gaps.

SCOPING

We work with you to determine the assessment scope based on CUI/FCI locations and data flow.

REMEDATION SUPPORT

We provide project and technical support to fill the gaps and shore up the weaknesses – helping your teams, practices, and processes become CMMC compliant.
